Footprints

See the light that guides your star, Let it show you who you are. See the light that shines at night, This light shines daily and at night.

Ask your guides what you can do
To help humanity start anew
Watch for footprints to guide you there,
If it feels risky, do you dare??

Now starts a new age, it's time for change
It might seem scary and somewhat strange,
Do not falter, walk brave and bold,
It's time for the new, out with the old.

Hold your head up, stand way tall,
Assert that you are able for it all.
There is only abundance, Love and peace,
And all negativity you will release!
